

**January 5<sup>th</sup>, 2013**

In a recently published interview, conducted by Hristo Laskov from Mergermarket EMEA, Viktor Manev shared his opinion on the expected most interesting M&A activity in 2013 in Bulgaria.

Among the other hot topics for the upcoming year is the sale of the third largest telecommunications company in Bulgaria - the Greek-owned Globul, combined with the privatization of the cargo arm of the local railway operator - BDZ Tovarni Prevozi (BDZ Freight Services), according to a number of local advisors. Viktor Manev, managing partner at Bulgarian advisory firm MMC, also tipped sale of Maritsa 2 steam-power plant as a potential hot sale target in 2013. But the market is set for another slow year, after the hard 2012, advisors say.
